

# CARPENTRY CONTRACTORS COMPANY

BUILT ON SAFETY

## TRAINING PROGRAMS

### **Built on Safety:**

The safety of CCC Employees is first and foremost. To ensure they have the skills to perform their jobs safely all employees complete company paid training.

### **From day one:**

An employee's first day involves classroom safety training. Followed by two more days of hands on training. The 90 day program, includes one on one time with our field trainers, and continues thru their career.

### **Learn from the best:**

CCC veteran field trainers are experts in their department. They have the knowledge to train and answer questions from employees at every level.

### **Custom tailored:**

Training is geared towards Employee's current role and department, this ensures that all employees have the knowledge they need to perform their job tasks safely and efficiently.

### **Continuous Improvement:**

Our continuous improvement culture ties to our training efforts. We learn from our experiences, value Employee feedback and view each day as an opportunity to be better.

*Small changes add up, and CCC grows thru the growth of our Employees.*
